

```

136
137 5. When you are comfortable appending text move to lesson 1.6.
138
139 ~~~~~
140 | | | Lesson 1.6: EDITING A FILE
141 | | |
142 | | | ** Use :wq to save a file and exit. **
143 | | |
144 | | | !! NOTE: Before executing any of the steps below, read this entire lesson
145 | | |
146 | 1. If you have access to another terminal, do the following there.
147 | | Otherwise, exit this tutor as you did in lesson 1.2: :q!
148 |
149 | 2. At the shell prompt type this command: vim file.txt <ENTER>
150 | | 'vim' is the command to start the Vim editor, 'file.txt' is the name of
151 | | the file you wish to edit. Use the name of a file that you can change.
152 |
153 | 3. Insert and delete text as you learned in the previous lessons.
154 |
155 | 4. Save the file with changes and exit Vim with: :wq <ENTER>
156 |
157 | 5. If you have quit vimtutor in step 1 restart the vimtutor and move down
158 | | the following summary.
159 |
160 | 6. After reading the above steps and understanding them: do it.
161 |
162 ~~~~~
163 | | | | Lesson 1 SUMMARY
164 | | | |
165 | | | |
166 | 1. The cursor is moved using either the arrow keys or the hjkl keys.
167 | | h (left) j (down) k (up) l (right)
168 |
169 | 2. To start Vim from the shell prompt type: vim FILENAME <ENTER>
170 |
171 | 3. To exit Vim type: <ESC> :q! <ENTER> to trash all changes.

```

```

:! ls|

```

```

| This concludes the Vim Tutor. It was intended to go to the next lesson.
| Command :colo[rscheme] is not yet implemented (PRs are welcome!)

```
